DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-16, drawn to a computer system having different computer components and linking programs.
- II. Claims 17-29, drawn to a method for billing individuals.
- III. Claims 30-33, drawn to a computer program for billing.
- IV. Claim 34, drawn to a method for tracking and recording patient treatments.
- V. Claim 35, drawn to a method for providing a point of service medical billing with diagnosis codes and procedural codes using 2 computers.
- VI. Claim 36, drawn to a method for providing point of service medical billing using a back end computer.
- VII. Claims 37-41, drawn to a software for billing medical care.
- VIII. Claims 42-46, drawn to a method for collecting data for medical billing.
- IX. Claims 47-49, drawn to a computer system for medical billing.
- X. Claims 50-67, drawn to a software article for point of care billing.

Art Unit: 3626

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Note that for simplicity, the groups are categorized as species, but maybe grouped together as different inventions. It appears that Applicant is mixing and matching different features as for patentability and these features are either considered

Art Unit: 3626

distinct to be considered different species or different inventions. For example, the following are applicable, using groups I and II above as different inventions.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, invention I can be used in a materially different process such as for databases relating to non-billing activities such as storage of flight information, etc. Vice versa, Invention II may be used with computer systems that does not require a front-end computer or a back-end computer and storage of particular databases on particular computers as required of invention I.

Thus, the reasoning for restriction of inventions maybe as follows:

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to John Goodhue on August 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
